

Information Systems Management (ISM) 2011

[Department of Supply Chain & Information Systems](#)

Overview

The Information Systems Management focuses on IT supported techniques for exploring, analyzing, integrating, and reporting business data for fact-based decisions. The coursework enables students to study basic concepts, principles, and methods for business analytics and gain an understanding of the best practices for aligning IT-supported analytics with business strategy.

A minimum of 22 credits is required with at least six credits at the 400 level. A grade of "C" or higher is required in all courses for the ISM minor.
